

Soil Humidity, Temperature and EC Sensor: 3 in 1

Description

Ideal for measuring soil humidity, temperature and electroconductivity. The steel probe is inserted into the ground for quick measurements. The lectures are compensated with the temperature to ensure accuracy. The probe can be embedded permanently underground.

Notable features are:

- Great accuracy
- Continuous readings
- Good coverage area

Technical Specifications

	Soil Humidity,
Reference	Temperature and EC
	Sensor
	-30°C to 70°C
Measuring	-22°F to 158°F
Range	0 to 100 %R.H.
	0 to 20 mS/cm
	0.3°C, over whole range
Accuracy	3%, over whole range
	±2% FS
	A cylinder with a diameter
Measurement	of 70 mm and a height of
Area	70 mm.
	Sensor centered.
