

Ambient Light Sensor

DIG-LUX1

Description

Sensor to measure ambient light, its response is optimized to mimic the human eye's perception of ambient light and incorporates IR and UV blocking capabilities. Included in a plastic housing with a transparent cover, and IP65 protection, for use in greenhouses, or outdoors.

Notable features are:

- Stable measurement, even after prolonged use.
- IP65 enclosure.

Technical Specifications

Measuring Range	0.045 to 188000 Lux
Operating Temperature	-40°C (-40°F) to 85°C (176°F)
