

Temperature Sensor

DIG-T1

Description

Used to measure the temperature of a system or environment and provide data for monitoring, control, or analysis purposes. Compact, strong and lightweight, can be used in harsh environments. Allows contact with liquids.

- Low consumption.
- Digital interface.
- Reduced maintenance.

Technical Specifications

Reference	DIG-T1
Measuring Range	-40.0 °F (-40°C) to 230°F (110°C)
Resolution	0.1°C, over whole range
Max. Error	0.5°C, over whole range
